.....

Frontend Technology Used *

- ☒ Next.js
- ☐ React.js

Backend & Database Used *

- ☒ Supabase (Authentication + PostgreSQL)
- ☐ Firebase (Authentication + Firestore)

Deployment Platform - Frontend *

Vercel

Did you use any AI tools while building this project? *

- ☒ Yes

☐ No

If yes, which AI tools/models did you use? *

ChatGPT, Gemini, Kiro AI

Does your GitHub repository contain a detailed README.md file? *

☒ Yes☐ No

Brief description of your project (50-100 words) *

EventVerse is an AI-powered event planning and vendor marketplace platform that helps users organize weddings, birthdays, engagements, baby showers, corporate events, and other celebrations. Users can discover vendors, explore venues, manage budgets, generate invitations, plan decorations, purchase event-related items, and receive AI-powered recommendations. The platform also includes vendor and admin dashboards for managing services, bookings, analytics, and platform operations.

What challenges did you face during development? *

One of the major challenges was managing and organizing event-related product and venue images. Finding suitable images for different event categories, products, and venues took significant time, and achieving a consistent visual appearance across the platform was difficult. Another challenge was implementing AI-generated invitation cards. The AI sometimes

generated invitations that did not perfectly match the selected event theme, requiring multiple prompt refinements and testing. Additionally, designing workflows for multiple modules such as event planning, vendor management, shopping, and venue exploration while maintaining a user-friendly experience was challenging.

.....

Any additional features you implemented beyond the core requirements? (Optional)

*

Keep NA if nothing

NA

.....

Mandatory Confirmations *

- ☒ My GitHub repository is public and accessible
- ☒ I have made regular commits with meaningful commit messages
- ☒ My application is successfully deployed and accessible
- ☒ I have recorded a demo video (5-10 minutes) using Loom
- ☒ I have uploaded the demo video on LinkedIn with proper tags (@OnlyAI Academy, #onlyai, #onlyai.academy)
- ☒ My README.md file contains project description and setup instructions
- ☒ I used the mandatory tech stack (Next.js/React + Supabase/Firebase)
- ☒ I have completed this project independently and honestly

How would you rate your overall experience with Assignment-2? *

1 2 3 4 5

Very Difficult ☐ ☐ ☒ ☐ ☐ Very Easy

Any feedback or suggestions for OnlyAI Academy? (Optional)
